Detailed Action

Allowable Subject Matter

1. Claims 1-12 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to the independent claims 1, 5, and 7, prior art fails to disclose or make obvious, in addition to the accompanying features of the claims, a microfluidic chip and method for mass spectrometric analysis comprising: a microfluidic body formed with a plurality of reservoirs for containing at least one fluid medium; a plurality of separated channels formed within the microfluidic body that are in fluid communication with a corresponding reservoir; and an electrospray ionization tip formed with an open-ended distal tip portion that is positioned along an end surface of the microfluidic body, wherein the plurality of separated channels converge at the open-ended distal tip portion to direct an ionization spray derived from the fluid mediums.

The dependent claims 2-4, 6, and 8-12, are allowable by virtue of their dependence upon the independent claims 1, 5, and 7, respectively.

Drawings

3. New corrected formal drawings are required in this application because the submitted drawings contain hand written labels, notation, and figure captions. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

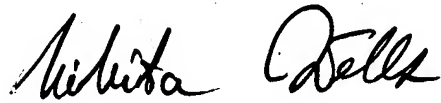

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. A.T. Timperman (2003/0089605 A1) discloses a microfluidic system and method to analyze large numbers of compounds or complex mixtures of compounds using a plurality of sample holding channels which converge at an output channel. Moini et al. (6,465,776 B1) disclose a mass spectrometric apparatus for analyzing multiple fluid samples concurrently, having a plurality of separated channels converging, but fail to disclose that the convergence of these channels ends up at the open-ended distal tip portion of an ionization spray.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
